

INNOVATIVE FEED ACT: Cutting Red Tape, Modernizing Animal Food Regulation

The bipartisan Innovative FEED Act would modernize and streamline the regulatory pathway for non-nutritive animal food ingredients that provide important public and animal health benefits, such as reducing human foodborne illness risks and improving animal production.

S. 1906

SENATE BILL INTRODUCED
BY SEN. ROGER MARSHALL
(R-KAN.)

H.R. 2203

HOUSE BILL INTRODUCED
BY REP. NICK
LANGWORTHY (R-N.Y.)

NGFA POSITION

NGFA supports the Innovative FEED Act because it will cut unnecessary regulatory red tape and modernize the U.S. animal feed industry by encouraging innovation while maintaining strict food safety standards. Europe, Japan, and Australia already have similar systems in place.

NGFA REQUESTS

- Co-sponsor S. 1906 or H.R. 2203.
- Pass legislation that will speed the approval of feed additives with production, health, and conservation benefits by as much as 10 years.
