

Nadine Garland

Lead Auditor, SGS

With more than 35 years of experience in food safety, animal feed, and sustainable agriculture, Nadine Garland has conducted over 1,000 certifications and developed food/feed safety and sustainability certification programs across the agricultural and food sectors. Her expertise includes certification auditing, program development, and sustainability assessment for farming and agricultural operations.

Nadine has spent 19 years with SGS, beginning as a subcontract auditor and later serving as a full-time Lead Auditor. During this time, she has gained extensive experience in food safety systems, animal feed certification, and sustainability standards across diverse agricultural supply chains. Her most recent work has been in the area of biofuel including sustainable aviation fuel.

She currently holds Lead Auditor and Certifier qualifications for ISCC and the SAI Farm Sustainability Assessment (SAI FSA), along with advanced certifications in ISCC CORSIA, Waste and Residue, Carbon Footprint, Co-processing, ISCC PLUS Circular Economy and Bio-Circular standards, RedCert2, Greenhouse Gas Assessment, and ENplus auditing.

Nadine earned a Bachelor of Home Economics from the University of British Columbia in Vancouver, British Columbia, with studies focused on food science, nutrition, dietetics, and general family studies. She has also completed coursework in Operations Management, Business Management, and Introduction to Quality Assurance through BCIT.

Combining technical expertise with decades of hands-on industry experience, Nadine is widely recognized for delivering thorough, practical, and integrity-driven auditing and certification services that support food safety, sustainability, and continuous improvement throughout the agricultural and food industries.
